Society of Engineering Science 51st Annual Technical Meeting

1–3 October 2014

Purdue University, West Lafayette, Indiana, USA

Novel fully-nonlocal energy-based formulation and high-performance 3D numerical realization of the quasicontinuum method

Amelang, Jeff, jamelang@caltech.edu; Venturini, Gabriela; Kochmann, Dennis, Caltech, United States

ABSTRACT

Although the conference website says 500 words (http://www.cvent.com/events/ses-annual-technical-meeting/custom-35-756e8099c25a4c6d8f5cc4d34954c419.aspx), this form is enforcing 400. Furthermore, the abstract text I am pasting here is 391 words, and yet the form is still rejecting it. I give up, I have been conquered by this form. The abstract is attached as a document.
